Specification Guide

Forma panel cladding is a long lasting, low maintenance alternative to timber that can be used on various exterior projects; from home renovations to new build apartments, sunrooms or contemporary garden rooms. This stunning material from the capped Forma® range looks as impressive as natural wood cladding with no need to paint, stain or oil. Forma cladding products come with a 25 year warranty.

Forma Decking Benefits

Ecoscape UK Forma composite products have all the benefits of Clarity, with the additional benefits afforded by the HDPE capping. This results in a decking board that is more hardwearing, stain-resistant, and resistant to colour fading. We are so confident in the quality of our board that we offer an industry-leading 25 year warranty.

Ecoscape UK Wood Plastic Composite products are made from recycled plastic and wood fibre. Choosing Ecoscape UK ensures this waste material is diverted from landfill, and given a second life.

Great Composite Benefits

Not only easy to install, with our hidden clip system, Ecoscape UK composite cladding is practical, low maintenance, and with our 25 year warrany,, will be sure to look good for years to come.

UV Stable with Colour Fade Warranty

Like all our Forma products, Ecoscape UK Slatted Cladding is fade resistant. Although not entirely fade proof, our cladding has been extensively tested - including artificial weathering test - and we offer a warranty against any fading due to light exposure and weathering in excess of ' Δ E=5' on the Hunter scale.

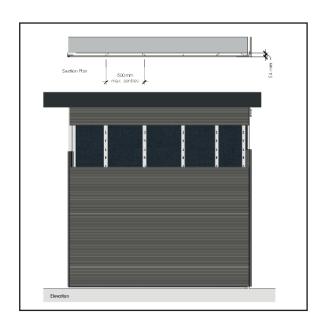

The example above shows the 'Havana' colour Forma product before, and after acceletated testing.

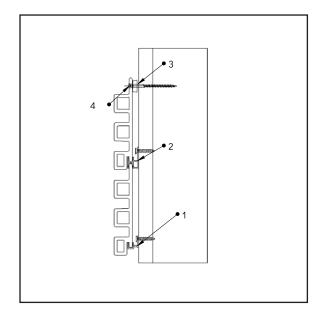

Working Specification - Slatted Cladding

Drawings below show a typical substructure detail for Ecoscape UK Composite decking (shown here with Ecoscape UK Plastic Joist Substructure).

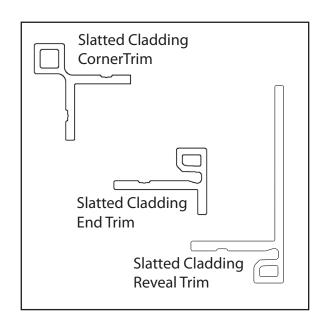

Ecoscape UK Composite cladding boards must be supported by a substructure placed at 500mm centres.
For further information, please see Ecoscape Cladding Installation Guide at www.ecoscape.co.uk

Ecoscape UK cladding should always be used with Ecoscape UK aluminium hidden clips system:

- 1. Starter Bar
- 2. Cladding Clip
- 3. Plastic Pad
- 4. Colour-coded screw

Our extensive range of trim profiles - including an end trim, external and internal corners, and a versatile finishing board - to ensure that you always get a neat finish for your project.

Specification Table

| Property | Test Method | Test Result | Test Requirements | Verdict | Property | Test Method | Test Result | Test Requirements | Verdict |
|---|--|--|--|---------|--|---|---|---|---|
| Appearance | EN 15534-1:2014 Section 6.1 EN 15534-4:2014 Section 4.3 | None of visible difference which wascompared to control sample. | | Pass | Moisture resistance under cyclic test conditions | EN 15534-1:2014 Section 8.3.2 EN 15534-4:2014 | Original MOR: 31.9 MPa After exposure, Mean MOR: 29.6MPa Deflection at 250N: Mean: 196 mm | Deflection under load at 250 Mean ≤ 6.0mm (Test span was at 500mm) | N |
